PROFESSIONAL SUMMARY

Senior frontend engineer with 10+ years building high-performance React and TypeScript applications across regulated fintech, enterprise, and high-traffic platforms. I specialize in design systems, accessibility, web performance, and frontend architecture, and in owning the full development lifecycle from design to production. Experienced collaborating with backend, product, and design teams, setting technical standards, leading design reviews, and mentoring engineers.

PROFESSIONAL EXPERIENCE

Senior Frontend Engineer | Valtech, Arizona *10/2021 - Present*

- Architect and deliver scalable, cross-browser frontend solutions using React, Next.js, and TypeScript as the primary frontend engineer across concurrent enterprise client engagements spanning fintech, enterprise B2B, and agribusiness, plus internal prototypes for sales pitches
- Led an 18-month enterprise platform migration to Optimizely with a 10-person cross-functional team — built 20+ reusable React/TypeScript components and 30+ page templates; drove Lighthouse score from 60 to 80+ and reduced initial JS payloads by ~30% through code splitting, lazy loading, and optimized API data fetching
- Leverage AI-assisted development tools to accelerate prototyping, improve debugging efficiency, and streamline development workflows
- Established Storybook-documented design system component library in React/TypeScript adopted by 6+ engineers; enforced modularity, reusability, and documentation as team practice
- Met WCAG accessibility standards across regulated fintech and enterprise deliverables
- Reviewed 200+ PRs annually, mentoring junior engineers and maintaining code quality across concurrent engagements on Optimizely, AEM, and Contentstack platforms

Lead Web Specialist | Northeastern University, Boston, MA *05/2020 - 09/2021*

- Sole frontend engineer for the university's marketing department - owned end-to-end development of customer-facing web applications across high-traffic university properties
- Built accessible (WCAG 2.0), SEO-optimized sites using React, WordPress, and Tailwind CSS; partnered directly with marketing, design, and external vendor teams

Web Infrastructure Intern | MathWorks, Natick, MA *07/2019 - 09/2019*

- Developed interactive components for App Designer (MATLAB application platform) using JavaScript and object-oriented programming for developer-facing tooling

Senior Frontend Engineer | Tata Consultancy Services, India *07/2015 - 07/2018*

- Led frontend development for 40+ responsive client websites across fast-paced, multi-client engagements; set technical direction and standards across concurrent projects
- Mentored engineers through code reviews; contributed to hiring decisions and led a team of 12 developers across project delivery

Website Implementation Specialist | Accenture, India *08/2013 - 06/2015*

- Built responsive websites in Adobe AEM (CQ5) for global pharmaceutical clients, collaborating with designers and backend teams to deliver performance-optimized digital experiences

EDUCATION

Executive MBA, Operational Effectiveness - Ottawa University, Arizona *04/2023 - 05/2025*

Master of Professional Studies, Informatics - Northeastern University, Boston, MA *09/2018 - 03/2020*

Bachelor of Science, Information Technology - University of Mumbai, India *06/2006 - 04/2009*

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML5

Frameworks & Libraries: React, Next.js, Storybook, Vue.js, Chart.js, GraphQL, PrimeReact, Material UI

Styling: Tailwind CSS, SCSS, Less, CSS3

Testing & Build Tools: Jest (Unit & Integration Testing), Webpack, Vite, Lighthouse

Tools & Infrastructure: Git, Azure DevOps, Jira, Vercel, CI/CD, Google Analytics (data layer instrumentation), Marketo

CMS & Platforms: WordPress (development & administration), Optimizely, Contentstack, AEM

Methodologies & Practices: CMS Migration (legacy audits, content modeling, component mapping), Agile/Scrum, Component-Driven Development, Code Review, Accessibility (WCAG)
